

Specialists in 100% diesel, 100% natural gas and integrated power generation solutions.

OUR COMPANY

Powerwest designs, builds, delivers and maintains high performing power generation solutions.

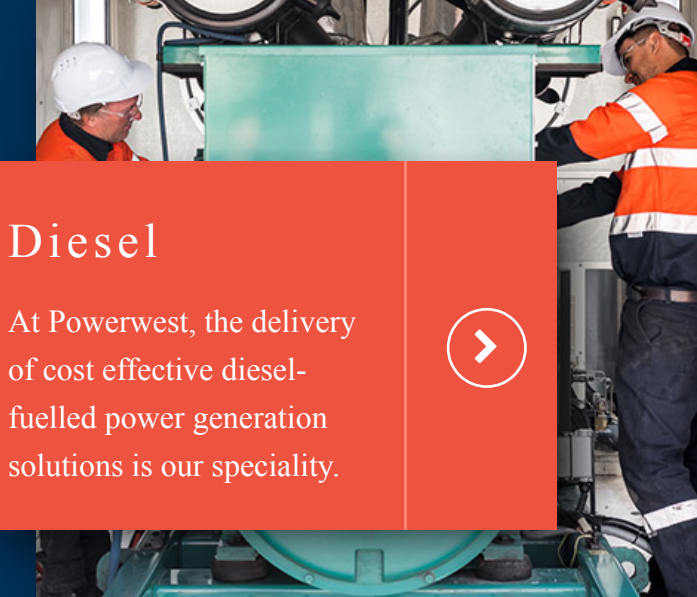

Since 1989, Powerwest has been the contract power supplier of choice for Australia's leading mining and resources companies. Proudly Australian and family owned, we are headquartered in Perth, Western Australia.

With a focus on building 'powerful connections' with our clients, we design, build, deliver and maintain power generation solutions up to 20MW that are reliable, cost effective and fuel efficient.

Powerwest designs, constructs and supplies power generators to remote locations.

OUR BUSINESS

Diesel

At Powerwest, the delivery of cost effective diesel-fuelled power generation solutions is our speciality.

Natural Gas

Powerwest recognises the benefits of gas power generation to those mine sites that are located close to gas pipelines.

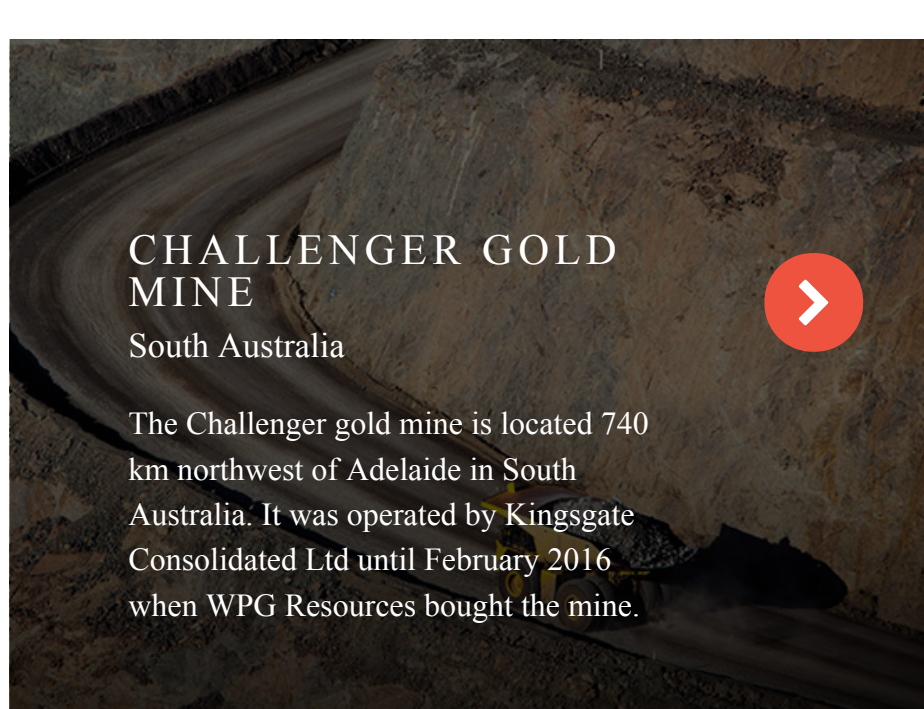

OUR SERVICES

Build Own Operate

A Powerwest build own operate (BOO) power station is a cost-effective solution for any location. Tailored to suit the size of your site and your environment, there are no up-front capital costs and the CAPEX of your project is reduced.
